

OCTAURUS

Lead the Sonic
Stampede!

Octaurus

As you hold the Octaurus in your hands, you're wielding a conduit to unbridled power. Stomp on the Bull, and he will stomp you back!

With its unmistakable vintage personality, it has been shaped to combine the best attributes of legendary predecessors into a single, standalone device.

Its layout is straightforward and intuitive, featuring a highly responsive set of controls for volume, tone, and gain.

Two toggle switches further expand its versatility:

- The left toggle switch alternates between a mid-scooped voicing (delivering a raw, industrial fuzz ideal for tight riffing and a pronounced octave effect) and a full-range voicing (perfect for harmonically rich lead lines).
- The right toggle switch selects between symmetrical and asymmetrical clipping, providing distinct flavors of tightness, feel, and definition.

It is a tour de force
of vintage sound
and feel.
